

"WORLD'S MOST POWERFUL STRIPPER"

MELT

One Pail of Melt is Equal to 4 of the Competitions

FEATURES

- 1 TO 20 FLOOR STRIPPER CONCENTRATE
- FAST ACTING
- CUTS THROUGH HEAVY BUILD-UP IN ONE PASS
- ULTRA CONCENTRATED
- EXTREMELY FAST ACTING
- LOW FOAMING
- SUPERIOR WETTING PERFORMANCE.
- STAYS WET FOR UP TO 30 MINUTES +
- CUTS LABOR COST BY 30%

MELT is a ultra concentrated 5x floor stripper. It cuts through and liquefies build-up and water based sealers with ease and little effort.

One quart makes 3 to 5 gallons. Melt is a floor stripper with a formula so powerful and economical that it's an absolute must for every floor contractor.

MELT is a concentrate. Strippers today contain 40% to 70% water in a single pail requiring low dilution rates at 1:4 to 1:8 at most. This costs the contractor money! Melt's formula dilutes at a minimum of 1:15 and up to 1:20.

BENEFITS OF USING MELT:

- INVENTORY A 1/4 OF YOUR FLOOR STRIPPER. (1 PAIL OF ERADICATE IS ABOUT EQUAL TO 4-5 OF YOUR NORMAL STRIPPER.)
- CUTS FLOOR STRIPPER COSTS IN 1/2 ON EVERY JOB
- IT TAKES A 1/4 THE PAILS OF STRIPPER TO A JOB.

DIRECTIONS

DIRECTIONS FOR USE:

Use for quick removal of stubborn, heavily built up water-based acrylic, urethane fortified finishes and sealers. For use on Vinyl Compost Tile (VCT), Concrete, Marble and terrazzo flooring. Do not use on painted surfaces or wood.

1. **Dilution:** NEVER use MELT straight. NEVER Exceed 1:15 dilution rate.
For heavy build-ups: Mix 1 oz. Eradicate to 20 oz. cold water.

Ideal Dilution rate is 1:20.
1 quart MELT to 5 gallons of water.
1 gallon MELT to 20 gallons of water. MELT can be mixed with warm water. Cold water is recommended.
2. **CAUTION:** Slippery! Place wet floor signs in work area. Thoroughly apply diluted stripper solution to the floor using a mop and bucket, auto scrubber or liquid application machine. Allow to dwell for 5 to 10 minutes. (Do not allow to dry)
3. Scrub floor with rotary floor strip machine or auto scrubber affixed with strip pads or brushes.
4. Remove soiled liquified solution with an auto scrubber or other pickup equipment.
5. Rinse floor with fresh water (for best results add Vision Technology's "Neutral Cleaner" to your rinse water) then pickup.
6. Let floor completely dry before applying one of Vision Technology's advanced Floor Finishes.
